

# Al Moutaz Bellah Ali

Frontend Developer

## Contact

### Phone

+201007176747

### Email

moutaz.ali.dev@gmail.com

### Address

beside chest hospital, Assiut,  
Egypt

## Education

Oct.2021-Dec.2021

Professional frontend nanodegree

Udacity

Jan.2022-Jul.2022

React Development

Eraasoft training center

Aug.2022-Sep.2022

React Development

Udacity

## Language

English

Arabic

## Projects

### Fullstack e-commerce

i have build a full stack e-commerce using React js for the functionality and Redux toolkit for state managment and Firebase provided by Google for the backend services

the site have the CRUD operation made by the admin for all the products and the site provides a real time update when you modify any data in the firestore storage

<https://github.com/MezoAli/E-commerce-using-React-Redux-toolkit-Firebase>

### MyReads app

I have build a website for book Shelves which has main three shelves for currently reading, want to read and already read and you can switch between books to any wanted shelf

the website has also a search page which obtain books from backend services provided by Udacity and you can add books to your shelf the data already stored in the backend so when you refresh or even close the app and return to it all data is already saved to the app

<https://github.com/MezoAli/MyReads-udacity-using-redux-Toolkit>

### Mapty app

I have build a website that uses your location to determine yor location and you can add activities to the map like cycling and running this data is stored into your local storage so when you refresh or closes the app the data is already stored into your local storage

<https://github.com/MezoAli/mapty-app>
